### Abstract

Although worship and devotion were the best devotional deed of the divine prophets, apparently some parts of prophets' worships in Quran and narration are being accused of including inappropriate requests, but it should be mentioned that it has nothing to do with the saint chastity. In this research, all the worships of which there are some doubt or questions about or even they, themselves, are the source of doubt and were hardly collected from various resources, then these worships were being analyzed and also there were some responses given to these questions, have been criticized and the closed ones have been boosted and selected or some new responds have been invented. And in some cases there was no respond, so it gave some. The collecting method was through library and on data invoking.
